A quiz on a given topic will be available at a specific date:

- for 3rd year students (according to the schedule),
- for 4th year students (according to the schedule)

The link to the quiz will be available on the Endodontics Department website in the **Announcements** tab (in case of classes returning to normal, clinical form the time will be set so that everyone is able to take it). **The quiz will be available for a limited time.** Failure to log in within the specified time limit and failure to complete the test results in a negative result [grade 2 = -10 points]. The quiz will consist of 10 test questions and will be assessed according to the applicable rules in the Endodontics Department (see Rules and Regulations). The 3rd year final quiz will consist of 30 questions. The threshold for passing each test is 60%. The quiz covers the current and all previous topics.

The time for each quiz will be determined individually depending on the level of complexity of the test questions and their number. However, it will always be increased by 30 seconds to enter identification data, see point 5.

1. After clicking the link to the quiz page, enter the security password provided to you by the Endodontics Department and press OK. After correct verification you will be directed to the start page.
